

enVista[®]

Hydrophobic Acrylic IOL

MONOFOCAL

All monofocals are not created equal. Make yours enVista. The clear choice for excellent predictable outcomes.

ABERRATION-FREE
OPTIC

GLISTENING-FREE¹

CRAFTED FOR EXCEPTIONAL TOLERANCE TO
DECENTRATION & TILT^{2,3}

The TruSight[™] advanced optic (AO) with SureEdge[™] design provides a desirable compromise between depth of field and image quality.³

+Based on bench testing with a model cornea.

Flexibility in IOL delivery with the available reusable BLIS inserter or the preload disposable SimplifEye inserter.

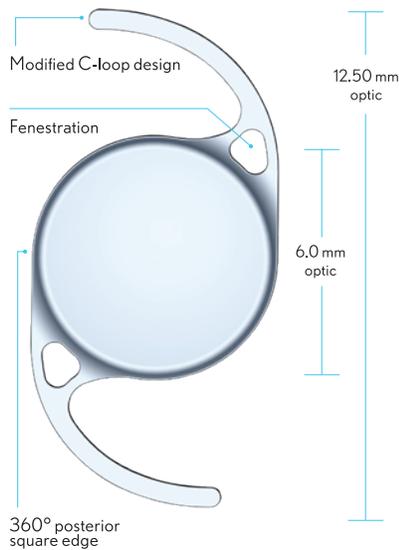

Provides an extensive diopter range to support a broad range of patient cases.

Storz® BLIS Inserter System

FOR INSERTING LENS MODEL MX60E; +0 D to +34 D with X1 cartridge; +0 D to +34 D with X0 cartridge
RECOMMENDED INCISION SIZE BLIS-X1 2.4mm or less; BLIS-X0 2.2mm-2.6mm
TYPE OF ACTION Screw-type
COMMENTS Controlled delivery. Reusable. Sterilization required.

SimplifEYE™ Delivery System

FOR INSERTING LENS MODEL MX60PL
RECOMMENDED INCISION SIZE 2.2mm-2.6mm
TYPE OF ACTION Screw-type
COMMENTS Preload design. Single use. Disposable.

Indications and Important Safety Information for enVista® IOL

INDICATIONS: Indicated for primary implantation for the visual correction of aphakia in adult patients in whom the cataractous lens has been removed. The lens is intended for placement in the capsular bag.

WARNINGS: Careful preoperative evaluation and sound clinical judgment should be used by the surgeon to decide the risk / benefit ratio before implanting a lens in a patient.

PRECAUTIONS: Do not resterilize this intraocular lens by any method. Do not use if the packaging is damaged or if there are signs of leakage. Do not store lenses at temperatures over 43°C (109°F) or lower than 0°C (32°F). Do not reuse the lens. Safety and effectiveness of the enVista IOL have not been substantiated in patients with conditions and intraoperative complications as outlined in the enVista IOL Directions for Use.

ADVERSE EVENTS: As with any surgical procedure, there is risk involved. Potential complications accompanying cataract or implant surgery may include, but are not limited to the following: corneal endothelial damage, infection (endophthalmitis), retinal detachment, vitritis, cystoid macular edema, corneal edema, pupillary block, cyclitic membrane, iris prolapse, hypopyon transient or persistent glaucoma, and secondary surgical intervention.

CAUTION: Federal law restricts this device to sale by or on the order of a physician.

ATTENTION: Reference the Directions for Use labeling for a complete listing of indications and important safety information.
